Press release 04/2010

Meier Solar Solutions: Clients attain excellent test results from ÖKO-TEST magazine

Bocholt, 26th April 2010. Meier Solar Solutions GmbH from Bocholt in North-Rhine Westfalia, the global market leader in laminators for encapsulating solar modules, would like to congratulate its clients for the excellent results they achieved in the ÖKO-TEST magazine performance test. In cooperation with the Photon Laboratory, the magazine published the modules with the highest specific energy yield. A total of 15 photovoltaic modules from German and foreign manufacturers were tested in the competition, eleven of which use Meier laminators in their production processes.

“The module producers aimed at improving efficiency have been relying on our innovative technologies and developments for many years,” said Florian von Gropper, CEO of Meier Solar Solutions GmbH. “The excellent performance of our business partners makes us proud and is also a confirmation for us that our product lines provide excellent quality,” he continued.

About Meier Solar Solutions GmbH

Meier Solar Solutions GmbH, global market leader in laminators for encapsulating solar modules, was founded in 1999. With registered offices in Bocholt and Rossla, the company offers a comprehensive portfolio of solutions for the encapsulation of solar modules within fully automated assembly lines. This year, Meier Solar Solutions GmbH was able to consolidate its position as global market leader still further. The success of the new product portfolios allows the company to keep moving in the right direction. Meanwhile, every third solar panel produced around the world stems from a Meier laminator. With more than 280 systems, Meier Solar Solutions is now the biggest manufacturer of installed laminators in the world. This underlines the dominance of Meier laminators and confirms the success of the company right across the board.
