PRESS RELEASE 11/2009

Meier Solar Solutions: Significant Increase in Incoming Orders in Third Quarter

- Positive sales trend
- Expansion of research & development

Bocholt, 13 November 2009, Meier Solar Solutions GmbH in Bocholt, the world's leading specialist in the encapsulation of solar modules, has had a particularly successful third quarter this year. Incoming orders have increased significantly and have resulted in a positive sales trend. Several manufacturers of crystalline and thin-film modules in Europe, North America and Asia have placed orders with Meier Solar Solutions GmbH and, as a result, are benefitting from the global market leader's cutting edge technology.

"The great interest in our products over the past few months proves once again the superiority of our technology, innovations and new developments," said Florian von Gropper, CEO of the special engineering company. Several large orders came in during the third quarter. "Customers put their trust in our years of experience and the expertise of our specialists, and are therefore strong supporters of Meier laminators. Consequently, the positive market trend is especially benefitting Meier," emphasised Hubert Vienken, COO of Meier Solar Solutions GmbH.

Research & development expanded by an extra segment

In order to be able to continue expanding our technological expertise, innovative energy and process optimisation on a global scale, the research & development department has been expanded by a further segment. The company has invested a great deal in systematic process optimisation in the last few months and has continued to optimise further operational procedures successfully. "All partners and new customers of Meier Solar Solutions GmbH will gain a lasting benefit from this development," said Dr Thorsten Sueck, head of the research & development department.

About Meier Solar Solutions GmbH

Meier Solar Solutions GmbH, global market leader in laminators for encapsulating solar modules, was founded in 1999. With registered offices in Bocholt and Rossla, the company offers a comprehensive portfolio of solutions for the encapsulation of solar modules within fully automated assembly lines. Meier Solar Solutions GmbH has expanded its position as global market leader even further this year. The success of the new product portfolio enables the company to continue this development. Already every third globally produced solar module comes from a Meier laminator. With now more than 280 systems, Meier Solar Solutions GmbH has the largest base of installed laminators in operation in the world. This highlights the dominant position of Meier laminators and confirms the company's success in every respect.
